

REQUEST FOR APPLICATIONS (RFA) FY18 PILOT AWARDS

Supported the Institute of AIDS and Emerging Infectious Diseases (State of Florida)

Deadlines/Award Timeline

- Pilot Grant Applications due July 19, 2017 by midnight
- Funding decisions will be announced by end of July

Purpose

The Institute of AIDS and Emerging Infectious Diseases in conjunction with Miami CFAR is now accepting applications for pilot projects in HIV/AIDS research. The purpose of this program is to stimulate new research and collaborations between basic and clinical researchers for generation of supporting preliminary data to increase competitiveness for extramural HIV/AIDS funding. Areas of interests are focused mostly on Cure/Reservoirs and Vaccine research. Applications for translational research and emerging concepts will be accepted.

To apply, visit our website: <http://hivaidsinstitute.med.miami.edu/Researchers/funding-opportunities/state-of-florida-pilot-awards>

Funds Available/Award Period

Awards of approximately \$60,000 each (direct costs only) will be given, with an 11 month project period (approximately August 2017-June 2018).

Eligibility

Investigators at the rank of Assistant Professor (in the research or clinical tracks) or above are eligible to apply. CFAR/IAEID gives priority to junior investigators, investigators new to HIV/AIDS and established investigators proposing projects representing a new area of study for them. State of Florida focuses on high impact research that can be completed in a short amount of time, regardless of senior or junior status. Collaborative projects are encouraged and defined as those involving two or more investigators from different disciplines, and/or different departments. Behavioral science investigators are encouraged to collaborate with clinical and basic scientists. Post-doctoral associates may apply if they have three or more years of experience and are working towards a transition to faculty status. Women and minorities are encouraged to apply. We strongly encourage applicants to strengthen their application by including a UM collaborator. Previous CFAR or State awardees are eligible to apply as long as there is no scientific overlap of any projects.

Speed Grant Review Program

The goal of the Speed Grant Review Program is to provide investigators applying for a CFAR/State pilot award with a critique that will increase the likelihood of obtaining funding. Attendees will receive one-on-one feedback on their Specific Aims page from up to 3 University of Miami faculty. Reviewers will be NIH funded researchers with experience as NIH/CDC/PCORI reviewers and with a background in HIV research.

The Speed Grant Review will be held on February 28 to enable participants to apply the critique to applications being submitted in upcoming cycles.

- Participants should be investigators planning to apply for a CFAR/State pilot award.
- Participation in this program is voluntary but strongly encouraged for junior and mid-level investigators and those senior investigators new to the area of HIV research.
- Participants should submit a single page draft of their proposed specific aims two weeks prior (due to Melanie by Feb 14) to the Speed Grant Review Program for review.
- Each applicant will have 20 minutes of feedback on their application per reviewer; following the 1st reviewer, the applicant will move to the next reviewer.

Speed Grant Review Program Duration (2 hours)

- Introduction of the CFAR mentoring program to Applicants and Reviewers (20 mins)
- Speed review (approx. 1.5 hrs)
- Summary (10 mins)

Space is limited so please contact Melanie Weiss (305-243-3345) m.weiss11@med.miami.edu no later than Thursday, February 9 if you are interested in participating.

Additional Information

Mentoring is a critical component of the success of the pilot projects. CFAR and State Pilot awardees (assistant professor level, post doc level and any investigator new to HIV/AIDS) are required to have a mentor and include a letter of support from their mentor in their application. The letter will need to detail exactly how the mentor intends to support the pilot awardee.
